

Dear Partner,

The programs at EME are evolving. Next year in addition to EME's MSc program taught in English, the spring semester of the EME Master's in Environmental Engineering will also be taught in English!! I'll be sending details in late February or early March, once the professors have sent me all the syllabi.

Here is a list of courses taught in each module, and the ects to be earned. The spring semester will start on February 6, 2017. Erasmus students should arrive on Thursday February 2.

**Mathematics & IT** **4 ects**

Geographic Information Systems  
Applied Statistics  
Data Bases

**Engineering Sciences** **4 ects**

Management Systems  
Environmental Management  
ICPE Facility Regulations  
Workplace Safety & Security

**Environmental Engineering-Wastewater** **4 ects**

Treatment & Valorization of Slurry  
Wastewater  
Waste Treatment & Valorization  
Urban Hydraulics

**English** **1 ects**

**Company Operations Project** **3 ects**

Internship Development

**French (optional)** **5 ects**

French (evening courses at CIREFE Rennes II)

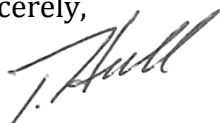

**Project** **6 to 14 ects**

Environmental Project

Environmental Engineering Project (starting in April) The student will be expected to propose a subject that he/she is interested in working on, and depending on his/her profile. The student will work with and be supervised by an EME professor (possibly in partnership with an enterprise). The number of ects will be defined in accordance with the amount of time spent on the project (roughly 1 ects per week).

I hope this program is attractive for your students. I'll be happy to answer any questions you may have.

Sincerely,

Thomas Hull  
International Relations Coordinator
