

Guidelines for allocating funds for international travel grant:

PhD-candidates and Postdoctoral fellows in NMBU's recruitment positions and Residents.

Guidelines:

- Awarding of grant presupposes support by the faculty and the supervisor.
- Travel grant can be granted for at least two and a maximum of six months.
- Maximum two stay at different institutions of high international reputation can be granted. Applicants shall document the collaboration with the institution they want to visit.
- If there are other alternative sources of funding, application shall be made to that source. If an application for funding for travel and living expenses from sources other than NMBU is accepted, the grant from NMBU will be reduced.
- International living expenses will be calculated according to the rates published by the Research Council of Norway. The funds can be used for travel and living expenses (one return trip per visiting institution (max. two). Any additional return trips must be justified).
- Funding will not be allocated for course fees, conferences, "bench fees" or operating expenses.
- If there are more applications than the budget covers, grants will be reduced and the principle that "as many as possible applications should be granted" will be used.
