9. Policy reform and the implications of the elimination of export subsidies
10. Assessing China’s industrial policy for global trade
11. Performance of marketing boards/state-trading firms for commodity trade
12. Evidence of developing countries participation in and use of the WTO
    processes and procedures to pursue their interests
13. The US-EU trade dispute involving the case of Airbus and Boeing
14. The use of anti-dumping: implications for the WTO
15. Concerns over international capital and multilateral rules on investment
16. Changes in the GATS and implications for a developing country
17. An assessment on whether trade liberalization or other policy measures
    determine GDP growth in a develop country(ies)
18. Relation of a country’s degree of trade liberalization/capital market openness,
    and level of income inequality: country cases
19. An assessment of product/service market integration in the EU (sectoral
    analysis)
20. Capital mobility within the EU on a sectoral level and/or by type of capital
    flow (foreign direct investment, portfolio investment, loans)
21. An analysis of market access restrictions (by country, by product)
22. Does slower trade growth imply a return of developing countries to
    immiserizing growth?
23. Middle-income traps: are middle-income countries’ growth rates being
    squeezed by high-tech and low-wage rivals?
24. De-industrialization: Are OECD countries with a large share of GDP in
    manufacturing susceptible to Asia’s supply chains?
25. Can (sub-Saharan) Africa’s clothing industry survive Asian (Chinese)
    competition?
26. Effects of Norway-Russia trade sanctions following the annexation of Crimea
27. Importance of declining transportation/communications cost for trade in goods
    and services
MACROECONOMIC INTERNATIONAL TRADE-RELATED
THESIS TOPICS

1. The effect of WTO accession on banking in China (or other country)
2. The effect of globalization on income distribution in a country
3. The case for a flexible exchange rate in China
4. The relation of the public sector debt and economic performance (country comparisons over the past 25 years)
5. The relation of household debt and economic performance (country comparisons over the past 25 years)
6. Quantitative easing’s effect on US trade vis-à-vis developing countries
7. Capital controls as a means of reducing hot money and capital flight
8. An assessment of an economy in transition: performance of macroeconomic indicators and social indicators
10. Employment, inflation and monetary policy since 2000
11. The effect of quantitative easing in US, UK and Japan on the capital inflows/trade flows into a particular developing/emerging market
12. Changing demographics in the EU (or in a country in particular): implications for the macroeconomy
13. An economic assessment on the decision to remain outside the EMU (Denmark, Sweden, UK): lessons for Norway
14. A study/assessment of the importance of international capital markets for developing countries
15. The economic implications of outsourcing on trade in goods or services (from the perspective of some country)
16. A study of capital markets in newly acceding EU countries
