

Candidate presentation David Martens

Faculty BIOVIT

Born 1996

Hi, my name is David

I study biology and I'm the sitting student rep in in faculty board, something I wish to continue to do. I think student representation and participation is important, and believe I do my part the best as a part of the faculty board. My overall goals are still climate and student well being. However my more specific goals are;

That the process of collecting/centralization IPV (Biology and plant sciences) doesn't leave behind the students, so we could get new reading rooms and gathering spots close to the rest of the department.

The animal science building should not lose there wonderful features such as the cantina, reading rooms, and easy access to advisor.

At the same time want to use the chance to encourage everyone to participate, ether by putting forth your candidacy (even against me) or, last but not least, by voting!

Thank you for your time

David Martens
