

Jardar Lindaas Bringedal

Faculty HH

Born 1996

Hello,

my name is Jardar and I'm in the first year, studying economics at HH. I have one bachelor degree in environmental science from MINA here at NMBU. I am 24 years old and I care a lot about the people around me, environment and nature. When I was at MINA I got the opportunity to be in the faculty council, and that was a good experience. I want to contribute also here at HH, so that our faculty can put even more weight on the big tasks we have in front of us in taking care of nature diversity and to stop the climate change as much as possible. Maybe we can manage more of this if we collaborate even more with the other faculties.

Good election!
