

Candidate presentation Thomas Reime Berthelsen

Faculty: KBM

Born 1998

Hi!

I have now started my fourth year in food science, a subject I have only become more fond of over time. Although I am very happy with the study so far, I have noticed clear potential for improvement, and now I feel that it is time that I contribute to strengthening the faculty. I have taken many subjects both in KBM and other faculties, and am therefore a lot to compare with. From position experience, I have been, and am, a BMU representative, and leader of Gay på Landet and Økohagen. In general, I have a strong focus on tidyness and welfare. More specifically, I will work hard to secure future food science generations, especially taking into account the end of the agreement with Christiania.
