

Candidate presentation Mads Westby

Faculty LANDSAM

Born 1998

My name is Mads Westby. I am 22 years old from a small town called Drøbak and I'm currently in my third year on "Real Estate". On a daily basis I usually study a lot and I also work in a warehouse as a parttime job. In my spare time I usually spend most of my time on the golf course. My friends describe me as a person with a good mood, great work capacity and that I am conscientious

Throughout my life I have always been active and have held a number of different positions. For example, I have been a student council representative throughout the upper secondary school and until I left high school. I was also responsible for Operation Day Work as a job manager at the upper secondary school. In high school, I was also the leader of a Buddy program for first graders as well as the Russepresident. After high school, I had a year off where I worked as a warehouse manager. In my studies at NMBU, I have not been as active as before, but I am the leader of Jordskifterlaget. I think the experience I have gained over the years can be beneficial for the work in the faculty board.

The reason why I want to apply as a faculty board member is that I want to gain a better insight into the faculty as a whole. At the same time, I want to be an influence on the faculty in favor of the student body.
