

Candidate presentation Mathias Løfsgaard

Faculty LANDSAM

Born 1995

Dear students,

My name is Mathias Løfsgaard, and I would like to promote my candidacy as a student representative to the faculty board at the Faculty of Landscape and Society.

I am 24 years old from Ottestad and I'm taking a master degree in urban and regional planning. My student life started in Oslo through a bachelor's degree in social geography at the University of Oslo. I had heard a lot of good things about NMBU beforehand, and after I started my studies here in 2019, all of my positive expectations have been met.

From my first semester at NMBU I became involved in student democracy as a class representative. I have always loved to engage myself in the community around me. Throughout my studies, I have been involved in social and professional associations, both at UiO and at the University of Utrecht, Netherlands. I am also allelected as a board member with the Red Cross Auxiliary Corps in Vestby- and Ås.

The experience from various associations and student councils together with work experience has given me good abilities for strategic organizational development and collaboration. I will take this with me to represent the students' opinions in the most productive way possible.

At LANDSAM, there are many different fields of study that require that the decision made from the highest level is correct for all students. With my candidacy, I will try to show the students' perspective so that we are not forgotten in the big decisions. After many years as a student at several different universities, I am well prepared to meet the challenges and choices that are reviewed in the faculty board.

As a representative I want to be available and active so that students feel that they can contact me if they have wishes, needs or want to promote a point of view. It will also be natural that I can be contacted if you have questions about issues that are being processed and how it will affect our everyday study.

I hope you will give me your trust
