

Candidate presentation Anders Endor Nordengen

Faculty LANDSAM

Born 1998

I study Urban- and regional planning, 3rd year.

I wish to represent the students at LANDSAM. I stand for election with two main issues.

1. The betterment of digital education.

2. The return to physical attendance as soon as it is possible.

It is important that the students at LANDSAM return to physical schooling as soon as it is safe to do so. Our new digital life leads to loneliness and poor learning environments. It would be a mistake to continue with digital lectures in the future.

I have experience from the student council, the linjeforening Jordskifterlaget and UKA i Ås.
