

Candidate presentation Oscar Østvold

Faculty MINA

Born: 1997

Hi,

my name is Oscar and I'm studying Ecology and Nature Management. The last two years I have been part of the board at Naturforvalterlaget, where I'm currently leader. Previously I have been a class representative in the student council at MINA. I want to make it easier for students to be heard on causes at our faculty and I want to create closer bonds between students, professors and scientists, so that we can all benefit from each other. With relevant experience from the faculty, I feel I can be a good student representative.
