

Candidate presentation Erlend Gammelsæter

Faculty MINA

Born 1996

My name is Erlend Gammelsæter 24 years old and comes from Gran in Oppland. I am in the third year of chemistry at KBM and the 3rd year of Environment and Natural Resources at Mina, as I am taking two bachelor's degrees at the same time. I am running for election as a male student representative on the faculty board.

I have organizational experience and have been responsible for business in IAESTE. Here I have brought with me important knowledge from internship, exchange and foreign students which is useful for KBM and which I want to add a lot of focus.

My motivation for running for office is to work for an even better student environment, which is extra important in this time we are in now. I want to work in order to make it easier going for exchange and more development opportunities that correspond with the subjects. I want to help create a stronger collaboration between MINA and KBM. Next year, a new study plan in food science will be considered, I hope for helping to influence this plan.

I want to:

- Have study plans and timetables that provide the opportunity for exchange.
- Have time off from teaching, lectures or compulsory requirements close to exam dates.
- Work for a good student environment and against loneliness.

I hope you will give me the trust to be your and the other students' voice on the faculty board. Good election
