

Candidate presentation Erik Vaet

Faculty MINA

Born 1995

My name is Erik Vaet, and I am a first year student at the renewable energy master program at NMBU. I also took my bachelor degree in renewable energy at Ås, and so I know the university and its social environment well. In my spare time, I enjoy spending time in the mountains, trail biking, and climbing.

I believe that the voice of students is an important contribution to the decision processes at the university, and that we, as students, should be able to influence our education. At the same time, it seems like an exciting task to be able to shape how NMBU manages its resources. Therefore, I am applying for a seat at the MINA faculty board. Important cases for me are course assessments, corona counter-measures, and well qualified tutors and relevant topics for students writing their thesis.
