

Candidate presentation Aksel Heggernes Nja

Faculty VET

Born 1997

My name is Aksel, i am 23 years old and i come from Lørenskog. I am currently on my fourth year at the veterinary medicine program at NMBU. I wish to run for re-election as the male student representative at the VET faculty board because i think that getting insight on faculty matters has been very interesting, and because i feel that i have been able to provide meaningful input to topics that are of concern to the students, together with the female student representative. Mental health among students and the quality of teaching at the faculty are matters that are of special importance to me.
