

Dear students at Handelshøyskolen

My name is Emiline Frantzen and I hereby wish to stand for re-election as a student representative to the faculty board at Handelshøyskolen. I am 20 years old and I am in my second year of Bachelor in Economics and Administration.

During my two years studying here, I have been very involved at NMBU. At Handelshøyskolen, I have been involved in, among other things, the Student Council, the Student Parliament, and Optimum. I have now been in the position for a year as a student representative on the faculty board and have learned an incredible amount in the position and gained a good insight into the various parts of Handelshøyskolen.

By participating in leading the Student Council has gained insight into many of the students' wishes. I want to get even more into the processes and continue to promote the students voice in the faculty board. With the new study program in bioeconomics, the continuation of the AACSB accreditation, and the changes that have occurred in digital teaching, a lot needs to be put in place and the students have a central role in this process.

We students must show commitment to be heard in the changes on campus, especially for us at HH now with the new design of the 1st floor in the Tower Building. I want to be part of the development of Handelshøyskolen, and that HH continues to aim for better quality in every subject.
