

My name is Emilie Netskar and I am a third year student at landscape architecture. I want to represent the students in the Faculty Board. The student democracy at NMBU is great, and I want to continue my work there. Since early fall, I have been the student representative in the program council for the landscape architecture study program, and it has been a pleasure. I think this kind of work is fun, and it will be instructive to learn more about the Faculty's strategy and budget. A part of my motivation is to see how the LANDSAM actually works, and that the work will bring good experiences. I hope I will get the opportunity to contribute into the future of the faculty and be a good representative.
