

My name is Ada Marie Orthe Karlsen.

I am 21 years and studying environmental and natural resources in the second year.

Running for office because I want to challenge myself as a person, learn more about how the faculty works and promote the opinion of fellow students.

As a person, I tend to tell if something occurs and make demands if there is a need for them.

Currently have a position as a student parliament representative and I represent my class.

To be a student representative on the faculty board seems very exciting to be a part of.
