

Hi!

My name is Gina Marie Granheim, and I wish to represent the MINA-students in the faculty board. I'm a third-year student at environment and natural resources, and I'm further planning to take a master's degree in the same direction.

I have experience from the student democracy through being deputy in the student council, class representative and representative in the undervisningsutvalg. I am engaged in my study program's student organization where I was part of the foundation and have been the leader for 2 years. Through my positions I have experienced what is important for us MINA-students, both professionally and socially.

I want to help the students to get through with their meanings and suggestions to the faculty board. Though my position as deputy, I constantly know what is going on at the faculty and what the students means. I think this knowledge, and my enthusiasm, is important to bring into the faculty board, and I therefor ask for your support.

Good voting!
