

My name is Marthe, and I hereby run for re-election as a student representative in the Faculty Board at REALTEK! I study environmental physics and renewable energy, and I am soon finished with my third year here at our amazing NMBU.

This last year I have been lucky enough to be the female representative in the Faculty Board at REALTEK. During this period, I have gained a lot of knowledge and insight in the works at REALTEK and our strategies. I would like to continue to use this insight in the Faculty Board. This position has been a great experience, and therefore I want to run for a new year in the Faculty Board.

In the autumn of 2021, there will be a change in the Faculty Board, when new members are elected in for a period of four years. I definitely think that there will be an advantage to be a part of this transition from the old to the new board. It will ensure a continuity, both with my experience from the discussions of cases during this last year, as well as my insight into the most important cases regarding the students.

The most important thing for me is to ensure that the voice of the students is heard. After a year of students being a lot away from campus, it is important for remind the board that we are still here. In the time ahead, there will be made decisions that will affect the students of REALTEK for many years. I especially think of the construction of pavilions and the work that has to be done to ensure REALTEK a place in the new plan for campus development in 2024. It is important to ensure that students have group rooms and areas to work in when they return to campus. I will work to make sure that our needs are taken into account when the future buildings and areas of REALTEK are discussed. I will work to ensure a transparent process, so that the students are both informed and has the possibility to influence the process along the way.

I hope that the students at REALTEK once again wants to give me their trust.

Happy elections!
