

Nordic Embryo Technology Association (NETA) board meeting notes

Date: 2021-09-30

Time (CET): 14:00-15:00

Venue: Zoom

Present: Ylva Sjunnesson, Irma Oskam, Jaana
Peippo, Jan Bojsen-Møller Secher

Discussion points

- Welcome and who takes notes: Ylva
- Draft of constitution (all): all present thought it was OK but we will check the language before we present it online.
 - Icelandic member(s): Ylva has found one contact on Iceland so far.
- Date for next year's annual meeting/WS:
 - In Uppsala, Sweden, 9th-10th of March 2022. Draft for the programme was sent out before the meeting. The specific focus will be Time Lapse. Jaana will contact a Polish group working with bovine embryos that might come and present for the animal side. A small slot for discussion regarding the web page will be added to the programme. A slot for information from Arcowin has been added. Ylva will send out the preliminary programme to all that previously been interested in the NETA WS as a reminder. Irma will put the preliminary programme on the web page.
- Web page or other visibility:
 - Facebook: we can keep this (Ylva administrator) but not everybody uses FB.
 - Linked in and ResearchGate might be options for the future, also linked to webpage.
 - Irma have organized a Webb page under NMBU that we can use without costs for now with the help of Kai Hänsch. Irma has sent out a draft of what we could have on the web page and all present thought it was good information that could be posted. Please send pictures related to ET/Embryowork to Irma for the webpage!
 - Irma will check how to put a "sign up as member" in some form on the web page.
- Other questions
 - Jaana has looked for a replacement/suppliant for Finland but not found anyone yet. Jaana is OK to stay on for now since she has many contacts in the area in Finland.
- Next meeting
 - Ylva sends doodle for November – December.
