

NSD

Data management and data management plan

Tore Andre Kjetland Fjeldsbø

Henrik Netland Svensen

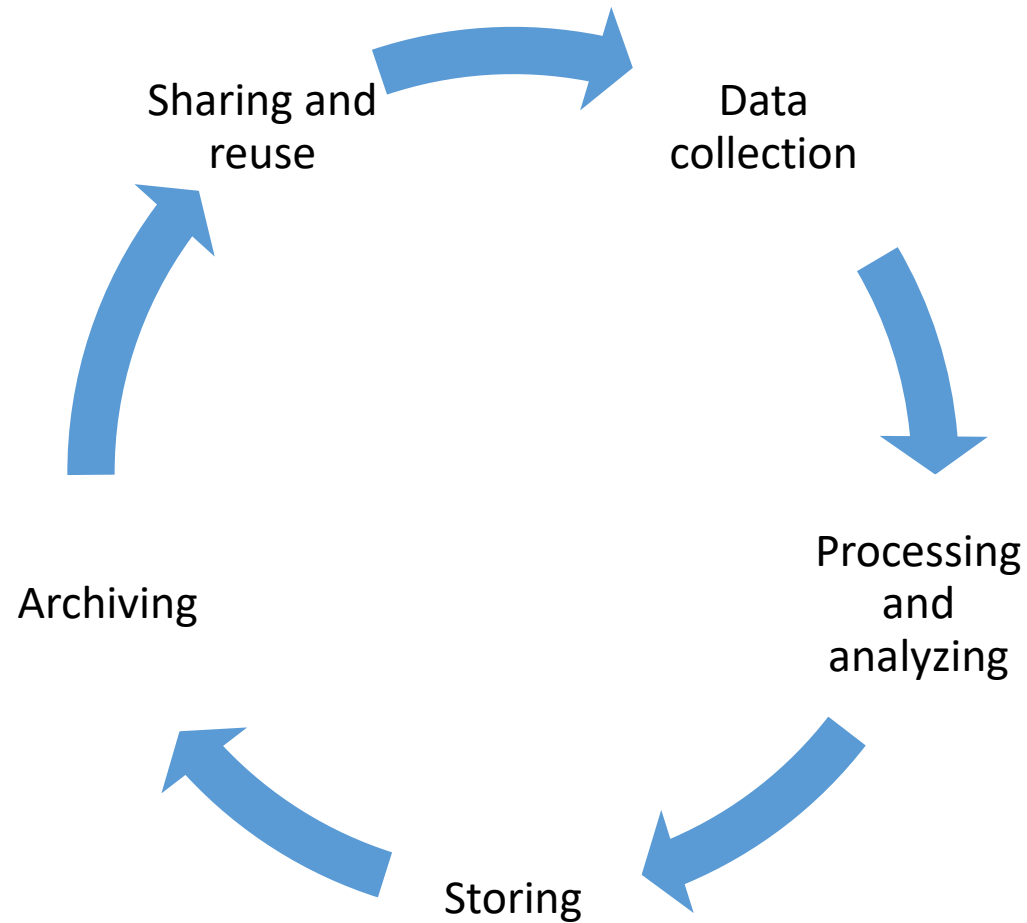

NMBU 27.10.2021

Basic concepts

- Research data
- Data management
- Metadata
- DMP – data management plan
- Data life cycle
- Storage
- Archiving
- FAIR principles

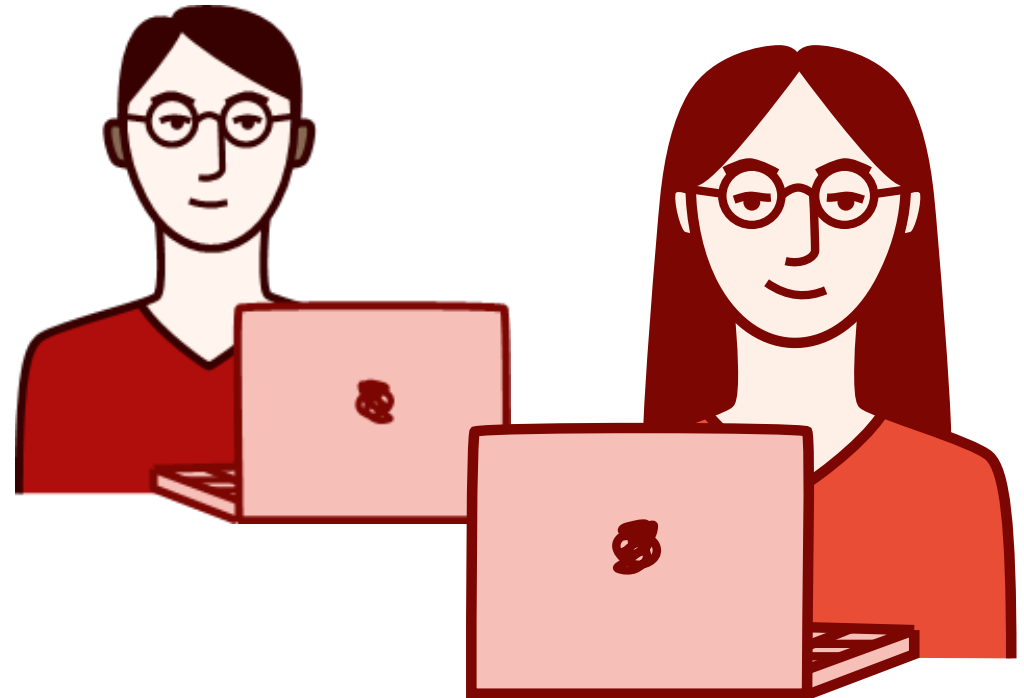

What's in it for you?

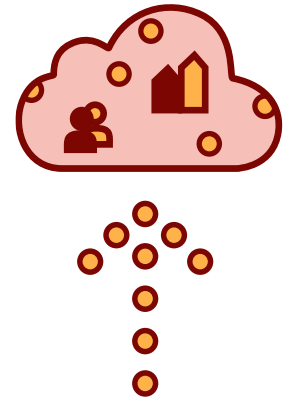

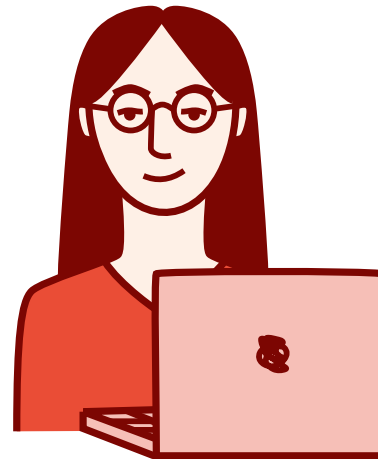

FAIR - principles

- **F**indable
- **A**ccesible
- **I**nteroperable
- **R**eusable

NSD DMP

- Meets requirements (NFR, H2020 ++)
- Online
- No attachments
- English/Norwegian
- Dynamic
- Sharable
- Exportable
- Many types of data
- Easy archiving
- Part of NMBUs documentation and overview

Min side, DMP

For researchers:

- Projects
- Other NSD services
- Archived data
- Data access
- Supervisors- shared projects
- Easy archiving

Prosjekter

[+ Nytt prosjekt](#) 

Tittel	Opprettet	
Fedme og overvekt blant barn og ungdom i Europa 	29.11.2018	
ACCESS Life Course - Upgrade & Expansion 	12.10.2018	

Meldeskjema

Meld behandling av personopplysninger

Datahåndtering

Lag datahåndteringsplan tilpasset krav fra forskningsrådet, EU osv.

Arkivere data

NSD tilbyr langtidslagring og synliggjøring av forskningsdata

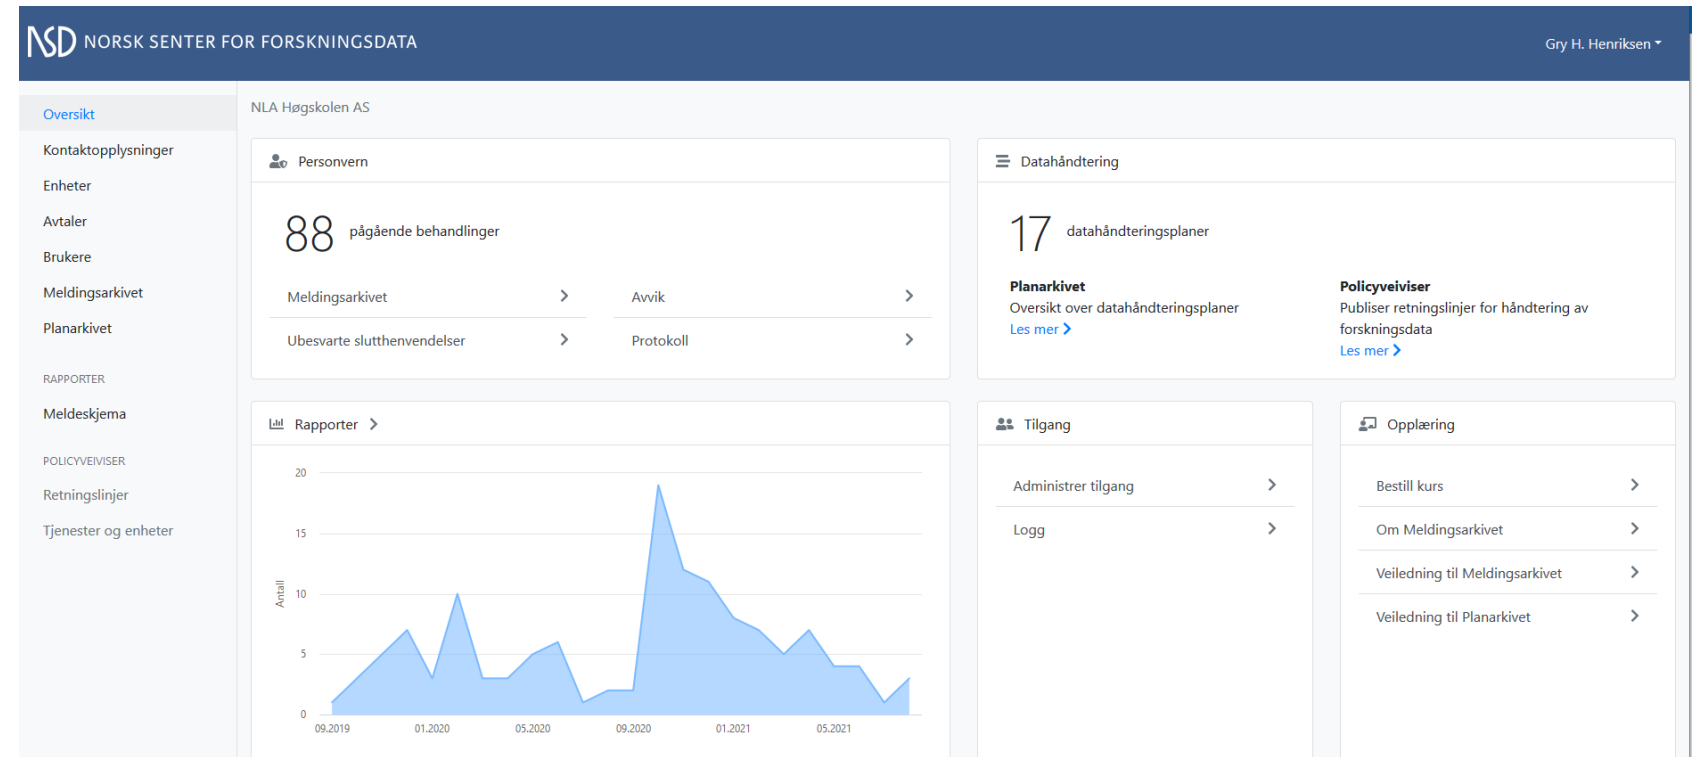

Datatilgang

Oversikt over dine datatilganger

For the administration

- For administrations:
- Easy overview
- Documentation
- Easy access

Let's look at the NSD DMP+

Cases for discussion

Case 1.

You are supervising four master students. They are all gathering their own data. Why is it good for you as a supervisor that they fill out a dmp?

Do you have any responsibility for their data collection?

Case 2.

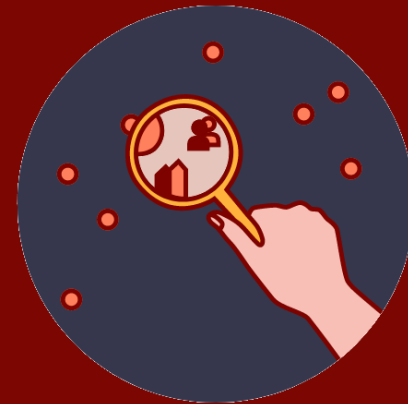

What is the most important element of a DMP?

for:

- Students
- Supervisors
- Research administration
- The institution

Thank you for your attention!
