

Bachelor or Master thesis BIOVIT 2021/22

Topic/Title

Storfeavl /NRF internasjonalt

Topic/Title

Dairy cattle breeding / Performance of Norwegian Red internationally

Summary

The export of Norwegian Red semen increases. Internationally is Norwegian Red used in crossbreeding with Holstein. Geno wants more knowledge on the performance of Norwegian Red internationally and has started data collection from several herds with crosses. The aim of the project is to compare the performance of Norwegian Red crossbreds with their purebred Holstein herd mates.

Subject area

dairy cattle, animal breeding, crossbreeding,

Language thesis

Norwegian or English

Bachelor or Master thesis

Master

Credits

30 or 60
