

Bachelor or Master thesis BIOVIT 2021/22

Topic/Title

Hydrolyserte proteiner i hundefôr

Topic/Title

Hydrolysed protein in dog's diets

Summary

Hydrolysed proteins from animal and plant ingredients have become a popular as dog food ingredient for several reasons; high protein content, high digestibility and palatability and a possible hypoallergenic effect with low peptide size or with use of rare protein sources such as feather. The thesis will be literature based with results from enzymatically produced proteins made from chicken by-products.

Subject area

Hydrolysed protein, by-products, pet food

Language thesis

English or Norwegian
