

Bachelor or Master thesis BIOVIT 2021/22

Topic/Title

CalfComfort: Positiv velferd hos kalver

Topic/Title

CalfComfort: Nurturing positive welfare in calves

Summary

The CalfComfort project will investigate the effect of different rearing strategies for calves on cow and calf behaviour, welfare, production and development. Three systems will be compared: conventional, enriched conventional and cow-calf contact. There will be opportunities for several MSc and BSc projects on different topics.

Type of thesis work

field work, literature study
